

The International Journal of Online Dispute Resolution

We are pleased to announce the launch of the International Journal of Online Dispute Resolution– an online journal presenting current initiatives and developments in the field of online negotiation, mediation and arbitration, as well as best practices and opportunities. The Journal publishes original and peer reviewed papers, reports, case studies and notes, book reviews, and commentaries.

ODR offers new ways of settling disputes, and new opportunities for practitioners to diversify and broaden their practice. The Journal will explore all approaches to technology-assisted dispute resolution, including online arbitration, a field of growing importance in the commercial context, both at the national and international level.

The topics covered by the Journal will range from national and cross-border ODR systems aimed at streamlining and improving legal and alternative processes in developed countries, to mediation of conflicts in the poorest or most violent parts of the world. The topics will include:

- Technological applications in dispute resolution.
- New approaches to the use of technology to prevent disputes
- The resolution of technology and telecommunications related disputes.
- Legal and technical aspects of innovative technological applications.
- Cross-cultural and legal comparisons in dispute resolution and technology.
- Use of technology in dispute systems design
- Digital divide implications and applications.
- E-commerce, M-commerce and dispute resolution.
- Resolution of e-governance/government disputes.
- Electronic funds/data transfer for dispute resolution.
- Cyber ethics/e-privacy/e-security for dispute resolution.
- Legal aspects of social engineering.
- Technology/telecommunications dispute resolution & policy.
- Any other topic that touches upon the interplay between technology and dispute resolution.

Aim and Scope

Being a highly selective and peer-reviewed periodical, the Journal encourages comparative, interdisciplinary, international, empirical, economic and technical, and/or national approaches and analysis in contributions. The Journal will bring together Internet industry leaders, government officials, members of the judiciary, banks and payment systems, consumer groups, the legal profession, arbitration experts, ODR proponents, and the academic and technical communities. It will provide a forum on how to efficiently implement alternative dispute resolution systems that will harmoniously coexist with current legal processes to increase access to justice. The goal of the Journal is to contribute to establishing an institutional framework of future cross-border ODR systems.

Call for Papers

Authors who are eligible for the journal should be experienced practitioners or scholars specialised in online dispute resolution. We also encourage the submission of interdisciplinary studies in the aforementioned fields of research.

All articles submitted will be blind peer reviewed by two or more members of our board of reviewers consisting of scholars who are experts in the field. A journal style guide is available from Eleven International Publishing.
