CYBERWEEK AGENDA

October 31-November 6, 2021
All times US Eastern

Sunday October 31

Power of Mediation with Smartsettle ONE (Graham Ross, Ernest Thiessen, Carissa Boynton, and Peter Holt). Enroll for a week-long event at the International eNegotiation Exhibition and join "Smartsettle ONE at Cyberweek." You will participate in a contest of asynchronous collaborative negotiations using Visual Blind Bidding. This event is open to anybody, students, working mediators, or interested individuals, and is primarily self-paced. The asynchronous nature of the contest can lead to long opponent wait times, so we encourage you to participate in multiple negotiations, and check back often to respond in cases waiting on you. For enhanced communication you can also join the Smartsettle ONE Cyberweek 2021 discord chat group with this link: https://discord.gg/RqAMP7pX

Monday November 1

(CLICK HERE TO JOIN - passcode workitout)
- Jim Melamed

3-4pm Panel on Transparency, Repeatability, and Auditability in ODR (hosted by Dan Rainey)

Transparency, Repeatability, and Auditability are concepts that every ODR principles or standards efforts address in some manner. How these concepts are functionally implemented is an open question. This panel explores the practical issues of what these concepts mean when implemented into a technology-dependent system that govern our interactions, contracts, and the disputes that result from them. Panelists include:

- [Ali Khan](#) was Called to the Bar of England and Wales in 2015, having since worked on contentious matters that involve conflicts of laws between Civil Code and Common Law 'Charter City' jurisdictions. He is currently an innovation fellow at the Charter Cities Institute and a partner at Mandeleo Partners LLP.
- [Chris Draper, PhD, PE](#), is a technologist who arrived in the field of dispute resolution through his efforts to modernize collective bargaining practices. He oversees contracting and compliance technologies as CTO of Third Coast Commodities in addition to his board member roles on dispute resolution startups IEP Equity and Trokt.
- [Lauren Thomas Quigley, PhD](#), is a Research Scientist focused on the development of responsible and inclusive technology. Specifically, she researches practical approaches for fairness and inclusion in AI, data representation, and projecting technology's impact on society and the environment, through a lens of social justice.
- [Ross Campbell](#) is a leader in using Distributed Autonomous Organizations (DAOs) as 'panels' to help resolve escrow smart contracts.
